

Digital Video Production [1 credit hour]

This module will facilitate skills associated with producing high-quality, effective instructional video footage; digitizing video segments for computer-based manipulation, editing and playback; and encoding video to be delivered on the web. Product: Students will create a digital video file that could be used in the development of future instructional website or multimedia computer programs.

Course Objectives:

- Identify how digitized videos can be used in the classroom teaching and learning. Correctly operate a video camera to produce videotapes that maintain visual continuity. Edit a videotape to maintain visual continuity.
- Compress your video for distribution via the World Wide Web.
