

Educational Research in Instructional Technology

[3 credit hours]

Course Objectives:

Upon successful completion of this course, learners should be able to function as effective consumers of research. As a consumer of research you will be able to:

- Demonstrate your understanding of the fundamental concepts of the research process, from idea formulation through data analysis and interpretation.
- Use your knowledge of the research process to identify and discuss research designs and procedures employed in IT-related research.
- Identify a topic relevant to education in your profession, conduct a literature review, and present the results of your literature review in a research report.
